Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. One time, though, we used some generic filters just because of the price differential.

After using up our supply of those we went back to the genuine 3M filters they last longer, fit into the unit better, and seem to really filter out noticeably more dust, etc. Unfortunately, the large box store in town carries just about every 3M air filter except this size, so we'll keep coming back to Amazon for them. In addition, the air is somehow more fresh after it has been running for a while. My nose is not irritated. I highly recommend this if you have allergies, a cat with dander, or asthma. The machine is quiet and sleek looking, and the filter is so easy to change. It does such an incredible job. I am always so shocked and amazed when I remove the door of the air purifier and remove the filter from it. In a few months, it absorbs such a huge amount of dust and dirt from the air. It turns from white to almost black and you can see everything sticking to it. Just thinking about breathing all that stuff into my lungs really creeps me out. I wish that it were easier to find the filters. I try to buy more than one at a time, so that I don't have to worry about running out of them. I sleep much better with Filtrete always running in my bedroom. Although it isn't offered through Amazon Prime, it did arrive a few days before the expected delivery date, which was nice. All in all, this is a great filter option they are usually so expensive and this is a great way to get clean air for a low cost. Why do filters have to be so expensive though. I usually vacuum to clean the filter every once in a while until I just can't get it to get clean anymore then I shell out the money for new ones. I've purchased in the past and the price seems to have increased significantly. We remind you, that it is highly advisable to carefully read the instructions before starting of using 3M FAP04RC 3M Filtrete UltraSlim Room Air Purifier, in case of unforeseen situations you need

immediately contact the nearest service center. The right choice of power source directly affects on the lifecycle of the equipment, and the amount of energy consumed will help optimize costs when using it. In such cases, we recommend our users to see related documentation or simply ask a question to other owners of 3M FAP04RC 3M Filtrete UltraSlim Room Air Purifier in the form below. The LSP portable resuscitation system has the complete equipment to provide 100% oxygen to breathing and non breathing patients. The LSP products also includes the Demand valve for emergencies. Secondary equipment for oxygen manifolds. Depends on the situation you will need oxygen kits complete with cylinder, regulator and oxygen mask, most of them are for home care. Manufacturers Allied Healthcare Products, Mada Medical, Western Medica, Ferno Washington, Meret, Cramer Decker We do carry all type of Airway Management equipment such as Intubation kits, Combitubes, Laryngoscopes, Fiber Optic blades, Endotracheal Tubes, Laryngeal Mask, Nasopahryngeal Airways, Guedel airways. Manufacturers SunMed, Teleflex, Rusch, American Diagnostic, LMA. Built in 3M HEPA filter for bacterial and viral protection. Adult and child suction settings. Built in overflow protection seal Efficient operation and simple maintenance. One hand operation. Large volume capacity. Disposable collection jar and catheter. To be certified, air cleaners must be tested for electrical safety and ozone emissions, and meet an ozone emission concentration limit of 0.050 parts per million. For more information about the regulation, visit the air cleaner regulation. Induct, wholehouse air cleaning devices may also generate ozone, but these are not currently regulated.

Check with the manufacturer of the induct device prior to installation. The list below shows air cleaning devices certified for sale in California. We will update the list as devices are certified. This category includes ionizers, electrostatic precipitators, PCOs, hydroxyl generators, UV light and other electronic air cleaning technologies. Devices that likely produce unsafe levels of ozone are found on our list of potentially hazardous ozone generators sold as air purifiers. Please note that the list below does not reflect air cleaner effectiveness, only safety. For help in selecting an effective air cleaner for your needs, you may wish to consult our guidance on selecting air cleaners. You may then type in the brand name, model name, or model number of the device you are searching for. Even a partial name will highlight results on the webpage. Some orders drop shipped from the manufacturer ship via other delivery services like Fed Ex or DHL. Large orders may ship via LTL truck with a 3rd party freight company. Delivery times vary depending on your orders destination. Most orders take 25 business days for delivery. UPS does not deliver to P.O. Boxes. Expedited shipping is available on some products at checkout for an additional fee. All expedited orders are shipped via UPS. Holidays may delay your order. Several states and territories, including Puerto Rico, Hawaii, Alaska, U.S. Virgin Islands, Guam and U.S. Military addresses, require air shipping for an additional fee. Currently, we only ship internationally to Canada. Most of these orders are shipped via USPS. Shipping rates do not include duties, taxes, customs fees, or any brokerage charges. Customers outside of the United States will be responsible for any additional fees upon receipt. The handling fee covers the cost of packing materials and labor used to pick, pack, and ship your order. Its hard to tell from a few feet away.

If you like quiet air purifiers that blend in with their surroundings, the Filtrete Ultra Quiet Air Purifier is the one for you. With quality particle filtration and simple operation, this 3M air purifier is not only efficient but also economical. The electrostatically charged 3M filter captures 99.9% of airborne particles 0.1 microns or larger, including pollen, mold, dust mite feces, smoke, and pet dander. Allergy and Asthma Friendly Product as designated by The British Allergy Foundation and Allergy UK. Effective for room sizes up to 110 sq. ft. Filter change timer lets you know when its time to change the filter; replace approximately every three months. Easy to replace the filter. Streamlined design takes up little space. Produces no ozone. 3speed fan. 1year limited warranty. The charged fibers in the filter capture microscopic debris like smoke, smog, household dust, pet dander, bacteria, and particles that can carry viruses. Additionally, the easily changeable filter

captures 99.9% of large airborne allergens like pollen, mold and dust mite debris. Compact, light and economical, this 3M air purifier is a good buy for someone wanting cleaner air on a budget. What I like about the 3M Ultra Quiet Air Purifier The best attribute of the 3M Ultra Quiet is that this air purifier is one of the most reasonably priced models available. Many models will cost you 2 to 3 times that amount to own and operate. Secondly, this unit is light and very quiet. This air purifier is low enough to be standing next to it and still hold a conversation over the phone without having to turn the unit down or off all together. While no 3M air purifier uses traditional HEPA filters, the electrostatic filters is made of the same media that makes Filtrete furnace filters some of the best and most popular available today. The electrostatic nature of the filter media leads to a cleaning efficiency that is higher than HEPA standards. The drawback to this is listed below.

What I do not like about the 3M Ultra Quiet Air Purifier The Ultra Quiet is limited by its size. An 11 x 10 room is about all the larger you can go with and this unit still be effective. Additionally, because 3M uses electrostatic filters in lieu of traditional, more expensive HEPA filter media, filter changes are more frequent. Still, with the added cost of the filter, this air purifier is inexpensive to own and operate, as illustrated by the cost listed above. Lack of smoke or odor control could be improved. While the filters to capture smoke particles, activated carbon is needed to tackle medium to heavy smoke and odor pollution. In summary, the 3M Ultra Quiet Air Purifier comes complete with the latest advances in air filtration technology in a stylish yet unobtrusive design. The filters provide high filtration efficiency and low airflow resistance which results in a highly efficient air purifier that operates quietly. This purifier offers a no frills approach to air filtration at a very reasonable price. For smaller areas in need of particle and allergen dander, dust mite allergen, pollen, mold spores filtration a 3M air purifier may be just right for you. See more Socalmindy, March 9, 2020 Written by a customer while visiting 3m.com 0 0 Average Rating 5.0 out of 5 stars Works great. I really never used an air purifier before so I wasnt exactly sure what to expect. However after using it in my bedroom for the last two weeks I have noticed a significant reduction in congestion at night. I have been sleeping much better and really believe it is due to this little machine.

The only downside is that it does make more noise than I expected but on the bright side it is white noise so it can be comforting at night. I would absolutely recommend this product especially if you have any kind of allergies or even pets. I got this item a few days ago and it is amazing what the filter catches. I would never have thought there was so much junk in the air. I never thought of getting one, but I am glad that I did. I wasn't paid for my review, and I love this thing. The smell is nothing more than any other new thing. I could see from day one that it was getting things out of my air. I can also breathe a little better. See more MrsHollyhocks, January 5, 2020 0 0 Average Rating 4.0 out of 5 stars Quite on I purchased this purifier because the guy downstairs smoke all day and night. So annoying. This purifier work well helping to eliminate most of the smoke smell. It helps me sleep better because of the cleaner air in my bedroom. Im purchasing another one for my living room. See more Deedee1998, May 17, 2020 Written by a customer while visiting filtrete.com 1 0 Average Rating 4.0 out of 5 stars Awesome!! I bought this last month after being quarantined from the corona virus and my my next door neighbors were chain smokers. I love it, it has the odor out in no time. All I smell now is CLEAN air. At night out it in my bedroom and it has helped my allergies tremendously. I would recommend this product to anyone looking for a good air purifier for a reasonable price. DD in Texas See more Tx Angel, May 26, 2020 Written by a customer while visiting filtrete.com 0 0 Average Rating 2.0 out of 5 stars too noisy.I plugged it in and it smells like burning plastic. Indoor Growing Commercial Dehumidifiers Commercial Dehumidifiers Knowing how these units work is the key to getting the best return on your investment. Highquality air purifiers need to be maintained in order to work most efficiently. With proper care and upkeep, your air cleaning system will work well for a lifetime. Unlike firstgeneration models, the topofthe line units now on the market are much easier to use, and maintenance can be done in a snap. How Air Purifiers Work Air purifiers clean the air of harmful pollutants, such as dust, dander, pollen, chemicals, and odors. They work by pulling air through a series of filters, which cleans the air by trapping polluted particles.

Then, the cleaned air is blown out by an electric fan. Why Maintenance Is Key Maintaining your air purifier involves only a few steps, depending on the type of air purifier you have Electrostatic Air Purifiers No Filters to Replace Electrostatic air cleaners are very easy and inexpensive to maintain. These units only require that you are committed to regularly washing the plates, generally once a week. To clean the plates, they can usually be taken out of system and placed in the dishwasher or submerged in the sink or bathtub. Having plates rather than a HEPA filter cuts down on the cost, because there are never any expensive HEPA filters to replace. PreFilters, HEPA Filters, and Carbon Filters Air purifiers that use filters to clean the air are the most common and the most popular units on the market PreFilters Prefilters can either be washed or inexpensively replaced, depending on the model purchased. They are constructed with a weave looser than the dense design of a HEPA filter. HEPA Filters HEPA filters are designed to pull the tiniest of pollutants from the air and trap them permanently. Their ability to effectively trap these pollutants makes HEPA filters the heart of any filterbased air purifier. It also makes the HEPA filter the most expensive filter to replace. Many of today's more sophisticated units, such as IQAir systems, have filter monitoring systems that let you know when to change each filter, or how much time you have left before the filter needs to be replaced. Carbon Filters Carbon filters, composed of activated carbon, work by trapping or absorbing the chemicals and odors from the air. Carbon filters come in a variety of densities and thicknesses, based on their level of purpose. Because the activated filter is the component of an air purifier that absorbs chemicals and odors, the bigger and thicker the filter is or the larger amount of carbon present in the filter, the better the air will be cleaned of chemical or odorous pollutants.

When carbon becomes activated, it opens up or becomes porous, creating tiny holes within the carbon where pollutants will be trapped. As the unit's fan sucks the air through the carbon filter, the activated carbon absorbs the impurities. Overtime, the carbon's porous holes fill up, becoming inactive and, therefore, ineffective. Regardless of the size of your carbon filter, it is important to maintain it. If your air purifier uses a thin carbon filter, then it will need to be changed more often, depending on how much you run the unit and the conditions of your indoor environment. For example, tobacco smoke will saturate a carbon filter quickly. With a small amount of maintenance, carbon filters will help you get the most out of your air purifier, eliminating chemicals and odors from your indoor environment. Remember, maintaining your air purifier will keep your unit working at top efficiency and your overall costs down. With a regular schedule and proper upkeep, you will enjoy a lifetime of clean, healthy air from your air cleaner. In Summary The most important air purifier maintenance is to replace filters as needed. This keeps your air purifier running properly and extends its life. Still Have Questions.
